

K2

24/25 SKI COLLECTION

K2 is the original American Ski and Snowboard Brand, founded in 1962 in Washington State. It started with a shop. A garage. A barn. An island. It started with an idea. It started with belief. It started with madness and mistakes. From a garage brand to a garage brand gone global. For now and always, K2 continues to thrive with innovation, craftsmanship, and commitment.

K2 MINDBENDER

SKI TECH

FREERIDE TECHNOLOGY

TITANAL

Y-BEAM
TECHNOLOGY

TITANAL Y-BEAM

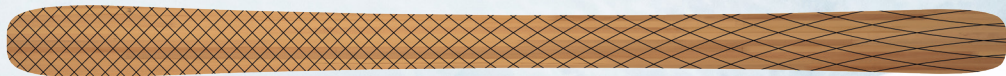

Titanal is placed directly over the edges in the forebody of the ski for predictable turn initiation. Underfoot the titanal spans the full width of the ski for maximum control and power transfer. In the tail we move mass away from the mount points increasing directional stability, resulting in consistent turn release.

SPECTRAL

BRAID
TECHNOLOGY
(U.S. PATENT
NO. 10,857,445)

SPECTRAL BRAID

K2's Patented Spectral Braid is a first of its kind variable angle reinforcement that allows for precision-tuned torsion and flex by altering the fiber orientation along the length of the ski. This makes our skis feel lively, energetic, and remarkably composed.

MINDBENDER 85

The Mindbender 85 is an ideal ski for anyone breaking out beyond the groomers. They are lightweight, forgiving, and intuitive - inspiring confidence in beginner-to-intermediate skiers looking to bring their improving skills to new parts of the mountain.

MINDBENDER 116C W

At the widest waist width in the Mindbender Collection, we tasked our engineers with perfecting a versatile powder crusher that our consumers have always wanted - and born was the 116C W. It's versatile enough to take on the burliest of lines while remaining maneuverable and playful in powder - the ultimate secret weapon for any steep and deep descent.

SKI TECH

FREESTYLE TECHNOLOGY

SPECTRAL

BRAID
TECHNOLOGY

(U.S. PATENT
NO. 10,857,445)

Spectral Braid

Another implementation of K2's Torsion Control Design, the patented Spectral Braid makes another appearance in the Reckoner collection. In this iteration, tighter fiber angles are found in the midbody of the ski, with more open angles in the tip and tail. The result is a ski with playful extremities coupled with a stable and powerful feel underfoot. This allows for more playfulness and forgiveness in the ski's extremities while maintaining a stable and powerful feel underfoot.

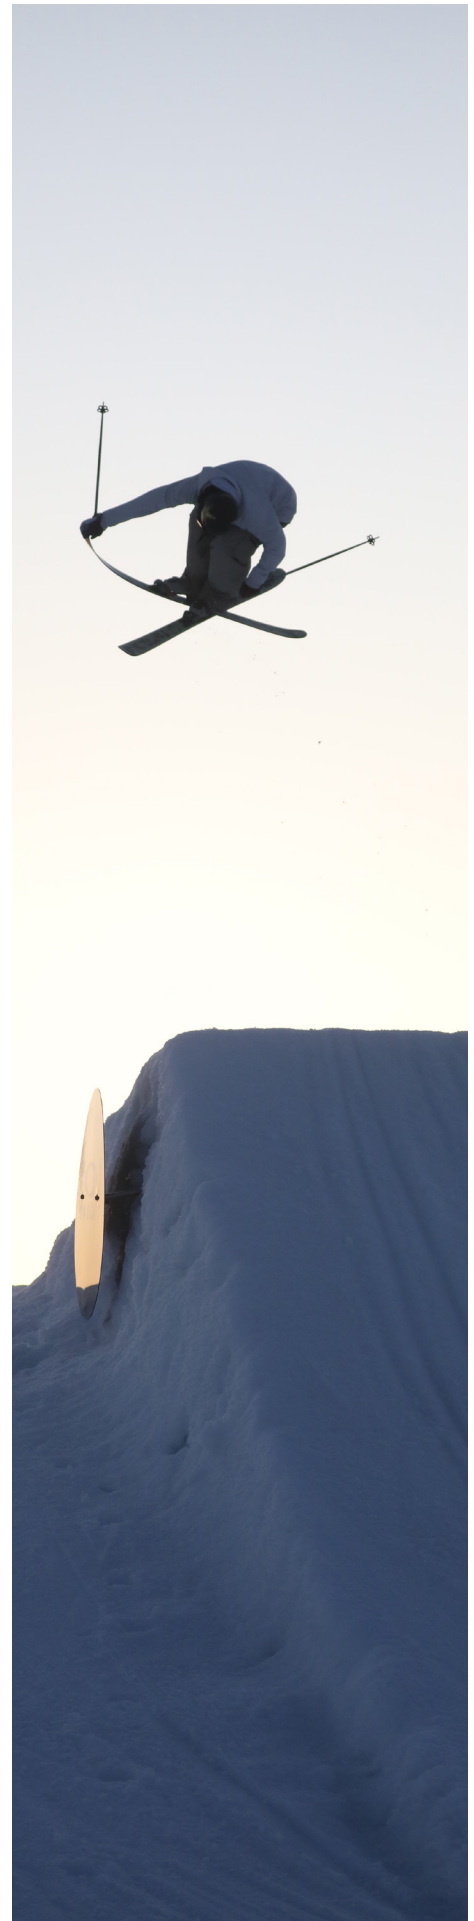

RECKONER 102

Featuring the same tech as its bigger siblings, with new technology for 24' The Reckoner 102 is a playful tool built for whipping cork threes off cat tracks, hitting butters and exploring all over the hill. Strapped with patented Spectral Braid construction, full sidewall and Aspen Micro Block core, it delivers on versatility and playfulness.

RECKONER 92

The Reckoner 92's will make all your wildest dreams come true. From the park to the trees, to the afternoon chop, these approachable, yet playful skis and their versatile All-Terrain Twin Rocker will have you wondering why you waited so long to jump on the twin-tip train.

SKI TECH

CARVING TECHNOLOGY

CARBON I-BEAM CONSTRUCTION

Full-length unidirectional carbon running from tip to tail, providing increased accuracy and energy along the entire length of the ski with a lighter, livelier feel than our Titanial I-Beam.

BEAM
TECHNOLOGY

TITANIAL I-BEAM CONSTRUCTION

Titanial runs tip to tail along the center of the ski, optimally shaped for stability and precision through the entire turn.

DISRUPTION Ti²

For those looking to maximize their carving to charging ratio -- you've come to the right place. The Disruption Ti2 is a no-hold, stable-as-a-rock hard-charging ski that doesn't know the meaning of second place. The Disruption Ti2 is the dampest piste ski we've ever built.
